

## **Ever Increasing Circles...**

We have increased our workforce by almost 30% in the last 6 months and would like to extend a warm welcome to our new US recruits. They will be spending the next few months training here in Northern Ireland.

With all this expansion and more to come, we wanted to make sure we had recruitment, training and personnel issues covered, so B9 have appointed Bernadine Robinson as HR Manager.

B9 is the only wind farm management company in the world to have triple accreditation for its Quality, Health, Safety and Environmental Management System (ISO 9001, ISO 14001 & OHSAS 18001)... and we're really proud of it!

It's central to our company vision that we maintain these high standards throughout our continuing expansion. With that in mind, B9 have appointed Kathleen Fergie as our dedicated Health, Safety and Environmental Manager and Sharon Crossan as our dedicated Quality Manager.
